The Volvo Environment Prize

The Volvo Environment Prize Foundation invites universities, research institutes, scientists and engineers as well as other individuals and organizations to submit nominations for the Volvo Environment Prize.

The Volvo Environment Prize was founded in 1988 and has become one of the world's most prestigious environmental prizes. It is awarded annually to people who have made outstanding scientific discoveries within the area of the environment and sustainable development.

The prize consists of a diploma, a glass sculpture and SEK 1.5 million.

You will find more information regarding the Volvo Environment Prize and how to nominate on www.environment-prize.com.

Laureates 2022

Small pieces of plastics are widely spread all over the world's oceans and ingested by living creatures. Microplastics are found in zooplankton, fish, seabirds, whales, seals, and also in humans. Yet, the long-term effects of this plastic pollution threat are still largely unknown.

Three scientists, Richard Thompson, Tamara Galloway, and Penelope Lindeque, who have conducted ground breaking research in understanding the impact of microplastics on humans and the environment are this year's laureates of the Volvo Environment Prize.
